

CLASS FORMATION AND STUDENT PLACEMENT POLICY

During term 4 the grade teachers in consolidation with their supervisors meet to discuss the most suitable class placements for their students in the following year.

In addition to the assessment data the teachers have collected throughout the year, each child's school history, interpersonal skills, academic ability, special talents, discipline, independence, confidence, friendships, strengths and limitations are considered.

Although most parents leave the decision of placing their child to the teachers' judgement, the school is prepared to consider parental requests for a specific placement. This does not ensure that the request can be accommodated as many factors are considered.

Student enrolment numbers may vary over the summer vacation. Therefore, students will not be allocated their new teacher or class until final numbers are known.

Kindergarten children enrol after they have completed their Best Start testing.
